Software Engineering Study Programme

INTERNSHIP REPORT

Project title

Team No. 1

Team members:

Student 1:	First name LAST NAME, FAF-241	_____
Student 2:	First name LAST NAME, FAF-241	_____
Student 3:	First name LAST NAME, FAF-243	_____
Student 4:	First name LAST NAME, FAF-243	_____
University Internship Mentor	Mentor name from the internship contract	_____

By signing the cover page of this report, each student confirms their active involvement in both the development of the project and the writing of the report. Students who did not contribute meaningfully are not permitted to sign.

Submission date: day / month / year

Chișinău, 2026

CONTENTS

Abstract **3**

Introduction **4**

1 Domain analysis **5**

1.1 Problem and user needs 5

1.2 Existing approaches and requirements 5

2 System design and security **6**

2.1 Architecture and technologies 6

2.2 Security 6

3 Implementation and testing **7**

3.1 Implementation 7

3.2 Testing and results 7

4 Team contributions and future work **8**

4.1 Contributions and lessons 8

4.2 Future work 8

Conclusions **9**

Appendices **11**

A Supplementary source code **11**

Internship Summary Report **12**

ABSTRACT

Summarize the problem, the implemented solution, the methods used, and the observed results. Keep completed work separate from planned development. This document is a reusable template; its fields and guidance must be replaced with the team's own report content. **Keywords:** domain, requirements, architecture, security, implementation, testing

INTRODUCTION

Explain the project context, the people who need the system, the problem, the internship objectives, and the scope of the work. Introduce the organization using a source that supports the description. Define abbreviations at first use. Cite adapted ideas, diagrams, tables and technical claims beside the claims they support.

1 DOMAIN ANALYSIS

Explain the domain, existing approaches, user needs and requirements before describing the design.

1.1 Problem and user needs

Describe the people, their workflow and the concrete difficulty being addressed.

1.2 Existing approaches and requirements

Compare relevant approaches using cited evidence and identify the resulting requirements.

2 SYSTEM DESIGN AND SECURITY

Explain the design and its decisions before presenting the detailed architecture.

2.1 Architecture and technologies

Cite each reused source at its first relevant use [1]. Introduce each diagram in prose, explain how the components interact, and justify the selected technologies. Put figure captions below figures and table captions above tables.

2.2 Security

Explain risks, access control, data handling, and tested protection mechanisms. Label proposals and untested controls as such.

3 IMPLEMENTATION AND TESTING

Describe the functionality actually implemented and the evidence for its behavior.

3.1 Implementation

Explain the relevant source code. Code longer than half a page belongs in an appendix referenced here; use Courier New 10 pt with single spacing.

3.2 Testing and results

Describe inputs, expected behavior, observed results and limitations. Illustrative values must not be presented as measurements.

4 TEAM CONTRIBUTIONS AND FUTURE WORK

Separate the contribution of each member from the team's shared result.

4.1 Contributions and lessons

State concrete responsibilities, delivered work and lessons. Do not invent attendance, biographies or individual contributions.

4.2 Future work

Describe remaining problems, intended improvements and the next implementation steps.

CONCLUSIONS

Relate the observed results to the objectives, state the main limitations, and distinguish implemented functionality from planned work.

BIBLIOGRAPHY

[1] Author or organization. *Source title*. Publication date. For an online source, add its URL and actual access date. Each numbered entry must support a citation in the report; arrange references in first-use order.

APPENDICES

APPENDIX A

SUPPLEMENTARY SOURCE CODE

Include longer code listings and supporting material referenced in the main text.

INTERNSHIP SUMMARY REPORT

on the activities carried out during the internship

Host organisation: _____

Department (unit): _____

Faculty of Computers, Informatics, and Microelectronics

Study programme: Software Engineering

Mode of study: full time

Year of study: _____ Group: _____

Internship period: from _____ to _____

Activities carried out and results obtained:

Activities carried out: _____

Results obtained: _____

Difficulties encountered during the internship:

_____

Conclusions and recommendations:

_____

_____

Date of completion: ___ / ___ / 20___

Signature of the student: _____
